Summary

I am a highly motivated and detail-oriented Computer Science student with a passion for Frontend development and a strong foundation in programming languages and web technologies. Eager to apply my theoretical knowledge in a practical work environment, I am actively seeking an opportunity as a Frontend Developer.

Featured Project

WoodenAura

React js

Tailwind Css

Redux

Firebase

A modern frontend web project built with React and Vite, featuring a minimal and fast development setup with hot-reload support and ESLint configuration. I used this codebase to design and implement UI components, structure responsive layouts, and improve interactive user experiences.

More Challenges

- Product Search Functionality
- User and email verification
- Optimizing for fast performance efficient component patterns.
- Designing a fully responsive layout that works smoothly across mobile, tablet, and desktop.
